About Mille Cunti

Mille Cunti is an association created in Ciudad Real in December 2014. Its founders and volunteers are young people who have joined or are still participating in European mobility programs, such as the European Voluntary Service, exchanges, seminars or Erasmus, within programs Youth in Action and Erasmus+.

We are passionate about languages; most of us speak three languages at least including our mother tongue, as we have always been interested in multiculturalism and being part of this world of opportunities offered to young people by the European Union. We also love photography, drawing and volunteering.

That's the reason why we decided to create this organization. Our main objective is to promote youth participation and to generate interest in those issues, and also provide people the opportunity to know and join youth programs, both European and local.

For these reasons we are working in our province in several projects in the fields of culture (books exchange and photographic exhibitions, for instance) and youth (animation activities, lectures, recreational and educational activities, among others) in order to encourage local participation of young people and spread the European spirit. To achieve this goal we collaborate with public and private institutions in our region, such as local town halls, hospitals, library networks and education institutions, secondary schools or universities.
